**Observation:**

There is no Infestation of any insect observed above ETL during Pest Scouting of Rice Crop for the 1st Week of July, 2021 However some spots of Borer, Leaf Rollar & Toka Below ETL were observed along with the incidence of Foot Rot, Bacterial Leaf Blight and Sheath Blight Diseases.Keeping in view the enviromental conditions, there is a chance that the infestation of insect pest along with the incidence of diseases may intensify in coming days so there is a dire need to have a close look on pest situation for timely management.
